For over 40 years, dedicated to defending dignity and fighting poverty
CORE VALUES

Transformation
We believe in urgent action, innovation, and the necessity of transformation—within the world and our own organization.

Equality
We believe in the equal value of every human being and the importance of respecting and honoring each individual; we know that change happens through people.

Integrity
We are accountable to the people and partners we humbly serve, transparently sharing our results, stories and lessons.

Excellence
We challenge ourselves to the highest level of learning and performance, tapping the best of the human spirit to create impact.

Diversity
We know that by embracing differences, actively including a variety of voices, and joining together we can solve the world’s most complex problems.

Our Goal
By 2020, CARE will support 3.95 million people from the most vulnerable and excluded communities in Nepal to overcome poverty and social injustice.

Our Vision
We seek a world of hope, tolerance and social justice, where poverty has been overcome and all people live with dignity and security.

Our Mission
CARE works around the globe to save lives, defeat poverty and achieve social injustice.

Our Impact Groups
Marginalized women and adolescent girls of Nepal, who are poor, vulnerable and/or socially excluded.
ABOUT CARE

About CARE International

CARE is a leading humanitarian organization committed to saving lives and fighting global poverty and has been working in over 100 countries across the globe. Working alongside a vast network of partners globally, CARE works to rebuild and improve lives of the most disadvantaged, poor and vulnerable communities. Through community based efforts, CARE works across the world to prevent spread of diseases, increase improved health awareness, increase access to safe drinking water, build awareness on sanitation, and bring communities together to expand economic opportunities and increase access to natural resources while protecting the environment. CARE seeks to influence policies and challenge social norms that affect the lives of women, children, and the most vulnerable communities through strong networking of partners, advocacy, increasing awareness on gender and women’s rights, leadership campaigns and skills trainings. CARE also works actively in emergencies by providing aid to survivors of war and natural disasters. CARE has zero tolerance towards any form of gender based violence, sexual harassment, fraud and believes strongly in equality, diversity and inclusion.

CARE Nepal

In Nepal’s most marginalized communities, girls and women always bear the brunt of poverty. But women and girls aren’t just the faces of the poverty; they’re also the key to overcoming it. This is why women and adolescent girls specifically from marginalized communities have always been our core impact population to combat poverty, fight social injustice, challenge social norms and empower livelihoods. CARE Nepal has been supporting the most vulnerable communities of Nepal to fight poverty and social injustice while providing capacity to empower communities both in policy and economic aspects over the last four decades of its establishment in Nepal. It is one of the key development actors in Nepal providing aid, relief and response in emergencies caused by various scales of natural disasters such as storm, flood and earthquake. By 2020, CARE Nepal aims to support nearly four million people from the most poor, vulnerable and excluded communities. We work closely with a vast network of donors, development actors, government entities, academia, research institutes, NGOs and civil society actors. From working around sexual reproductive health to mobilizing male influencers for gender equality, gender based violence, establishing mother networks to mobilizing clubs for issues related to adolescent girls, livelihood trainings, awareness on sanitation, increased access to natural resources, and increased access to safe drinking water to nutrition security to disaster risk reduction initiatives, CARE Nepal works around varied humanitarian spectrum. CARE has zero tolerance towards any form of gender based violence, sexual harassment, fraud and believes strongly in equality, diversity and inclusion.

In the fiscal year 2019, CARE worked in 100 countries around the world and implemented 1,036 projects and initiatives to reach 68.7 million people directly. CARE also reached 401.3 million people indirectly through its advocacy, replication of successful programs and scale up of innovations.
CARE Nepal’s Theory of Change

Program Goal
By 2020, CARE will support 3.95 million people from the most vulnerable and excluded communities in Nepal to overcome poverty and social injustice.

Socio-economic Empowerment
Marginalized women and adolescent girls have the knowledge, skill, agency, power and resources to claim their rights.

Transformed Social Norms & Structure
Nepalese society in all its forms values and upholds the rights of women and girls; and assures their access to quality services.

Social & Political Power
Women and adolescent girls are able to exercise their citizen power and effectively engage with accountable and gender responsive institutions.

Together with our partners, we form a powerful movement in the pursuit of a world free from poverty. On behalf of our dedicated staff and the women and adolescent girls that we work with in Nepal, we offer our deep gratitude to our partners.
Many social and cultural norms and harmful traditional practices such as: son-preference; stigmatization of widows; seclusion of girls and women (e.g., menstrual seclusion ‘Chhaupadi’); domestic violence; child marriage, polygamy; dowry system; human trafficking; pose additional barriers to women’s and girls’ empowerment. With an aim to combat these social evils, CARE, through its LEAD program, works to transform these norms and practices and create an enabling environment for women and girls to be valued in the society and be able to claim and exercise basic rights and services.

Recognizing that education is key to women’s and girl’s empowerment, this year, along with other activities under this program, CARE Nepal placed a special focus on provision of quality education (formal and non-formal). We provided adolescent girls from marginalized and vulnerable communities with the opportunity to pursue their education through Udaan Accelerated Learning Centres which is an accelerated learning program open to girls from marginalized communities between 10-14 years, who have dropped out of school or never been to school. The joyful learning environment adopted by this model informs the girls about their basic rights and makes them realize their aspirations in life which enhances their interest in continuing education. Some of the girls who have studied in these centres have also been part of the Girls’ Right Forum, a platform managed by girls which advocates about adolescent girls related issues on Gender-Based Violence, Education and Child Early and Forced Marriage with the Government.

CARE also engaged with local religious leaders and government stakeholders to obtain support for opening Udaan centers in formal schools and Madrasas (A Muslim school or college that is often part of a mosque) to ensure smoother transition of the graduates of such centers into formal schools. This year, we have opened Udaan centers in two Madrasas in Kapilvastu where Government approved condensed curriculum from class 1-4 is being taught to Muslim as well as non-Muslim girls.

UDAAN gave me a second chance to continue my education and I am very thankful for it. When I grow up, I want to become a teacher so that I can help other girls to continue their education as well.

— Neha Yadav, 13
### Our Initiatives

#### TIPPING POINT
This Kendeda/CARE USA funded initiative works with adolescent girls from areas with high child marriage prevalence rates in Kapilvastu and Rupandehi districts with an aim to address the underlying causes of child marriage through a dynamic process of innovation, analysis, learning and advocacy.

#### MAITRI
This CARE USA funded initiative works with Dalit and marginalized school going girls of Kapilvastu and Rupandehi districts of Nepal and selected regions of India with an aim to ensure that they have access to safe and secure education that enables them to develop necessary skills for improved life opportunities.

#### HAUSHALA
This PCTFI/CARE USA funded initiative works with girls from vulnerable and marginalized communities of Kapilvastu and Rupandehi districts who have dropped out after early grades or have never been to school with an aim to ensure that these adolescent girls have better life opportunities by building their capabilities to pursue opportunities and realize their aspirations.

#### CHHORI KO SHIKSHYA
This Tune Foundation-funded initiative works with adolescent girls from vulnerable and marginalized communities in Kapilvastu District who have dropped out from or have never been to school to empower them to complete their primary and/or secondary education.

#### UDAAN
This OFID/CARE Austria funded initiative works for the marginalized and vulnerable adolescent girls in Kapilvastu district. It supports the girls who are out of school by providing them a second chance to continue their education, providing livelihood opportunities and leadership development.
According to the Nepal Demographic and Health Survey 2016, 3 in 10 women in Nepal are survivors of violence, and 23% of the respondents endorsed the act of beating by their husband. Most of the survivors do not seek help. CARE Nepal is responding to Gender Based Violence (GBV) and Violence against Women (VAWG) through its PREVENT program. Evidences reveals that PREVENT interventions in its impact areas have supported to curb the increase of intimate partner violence, and strengthened knowledge and skills on violence reporting mechanisms in targeted adolescent girls and women.

CARE’s signature ReFLECT (Regenerated Freirean Literacy through Empowering Community Techniques) methodology builds on the communities’ own local knowledge and analysis of the immediate environment. It is a participatory tool used to conduct dialogue on issues and challenges faced by the communities to foster collective action. It makes people critically conscious of the unjust systems and barriers, which discriminate, oppress and exclude women from services, rights and decision-making. Through such approaches and tools, CARE sensitizes women to seek support and report incidents via informal groups, friends and GBV hotlines. CARE also strengthens the capacity of service providers to carry out their duties and register, investigate and prosecute reported GBV cases ensuring timely delivery of justice to survivors.

“
For the first time in my life I felt I was not alone, as I participated in the REFLCET group and listened to the stories of women like me. If not for the REFLCET group and the participants, I would not have had the confidence to say NO to violence.
– Rena Chepang, 37

**Total people directly reached in 2019**

31,526

**Total Women and Girls directly reached**

18,751

**Total Men and Boys directly reached**

12,775

There is a recorded 2.6% decrease in violence faced by impact communities in Gorkha and 1% decrease in Accham.
Our Initiatives

SAFE JUSTICE
This DFID funded initiative works with poor and marginalized populations with a focus on women and girls in Sindupalchowk, Dhading, Gorkha, Achham and Bajura districts of Nepal with an aim to ensure that communities have improved experiences of safety and access to better quality security and justice services, particularly for traditionally excluded and marginalized groups.

SAMBODHAN
This World Bank funded initiative works with women and girl survivors of gender based violence in Kathmandu, Bhaktapur, Lalitpur and Nuwakot districts of Nepal with an aim to improve the response to gender based violence in Nepal by improving the quality and reach of services for its survivors through a helpline, promoting greater awareness among key stakeholders and strengthening the capacity of National Women Commission.
CARE has been responding to various natural disasters faced by Nepal every year with one of our most prominent responses being our work with the families affected by the Mega Earthquake of 2015. The earthquake affected different communities at different scales out of which women, elderly folks, children, and people with disabilities were the most affected. In 2019, four years after the earthquake, to support the Government’s efforts, CARE implemented actions with a focus on livelihood and assets recovery, recovery of infrastructures, recovery of basic service systems (health, water, education, transportation etc.) and psychosocial recovery. To ensure that such communities are better equipped to deal with such disasters in the future, we also integrated disaster risk reduction and preparedness along with the recovery activities with a focus on building earthquake resistant structures, repairing and reconstructing toilets, drinking water supply systems and health facilities that are resistant to disasters.

Water and sanitation is one of the most important human needs during relief and recovery after a humanitarian crisis. The earthquakes of 2015 affected the underground and spring fed water sources needed by remote communities for their water supply in addition to other drinking water supply systems. Furthermore, women are disproportionately affected by the resulting water crisis, as they are often responsible for collecting water. This takes time away from work, school and caring for family. As such, CARE has been implementing WASH recovery and reconstruction interventions in 7 districts after the earthquakes through which 37,696 HHs have been reached through sanitation and hygiene services since 2015.

Since 2015 till present CARE has rebuilt/renovated 123 disaster resilient water schemes benefitting approximately 10,248 households.

"Bringing water from a height of 3,900 meters looked difficult before but we have done it together as part of the water user and sanitation committee and I am glad that our community now has access to water in their own yards. Life is much easier now."

– Purnima Gurung, Laprak, Gorkha
Our Initiatives

EARTHQUAKE RESPONSE AND RECOVERY

This initiative funded by various donors namely (Global Affairs Canada, DFID and a Pooled fund comprising of support from various donors) works with communities affected by the April 2015 earthquake in Gorkha, Sindupalchowk and Dhading with an aim to provide lifesaving shelter, water sanitation and hygiene.

STORM RESPONSE

A powerful storm hit southern Nepal in March, 2019 taking lives of 31 people and injuring hundreds. In response to the same, CARE Nepal led consortium funded by DFID (NERF) supported few affected families with non-food items and emergency supplies in Bara from the stockpiled relief materials.

PRAYAAS II

This ECHO and ADC funded initiative works with communities that are most vulnerable to disaster with special focus on marginalized people in Sindupalchowk, Gorkha, and Makwanpur districts of Nepal with an aim to strengthen resilience of said communities to natural disasters through integrated risk governance, safe reconstruction and risk transfers mechanism.
CARE works to reduce maternal and newborn mortality and improve health outcomes by placing a special focus on increasing the quality, responsiveness and equity of health services through its NURTURE program. Through the various initiatives under this program, CARE has been engaged in supporting government to enhance access to health services and ensure quality service delivery at all levels. We have also provided technical assistance to the Department of Health Services (DoHS) during planning of nationwide activities related to maternal and child health with special focus on family planning.

CARE has also supported the Ministry of Health and Population (MoHP) in construction of health facilities, construction and renovation of birthing centers and training to health workers on skilled birth attendance (SBA). In 2019, we have placed a special focus and family planning - Long Acting Reversible Contraceptives (LARC) on the Nepal Government’s Female Community Health Volunteer program through our initiatives like Samman and Suahara. CARE Nepal supported the Government technically and financially in revision of new FCHV strategies. Moreover, with learning from CARE Bihar’s incremental learning package CARE Nepal led the development of an FCHV learning package along with other development partners on various health issues of the community. The package was endorsed by Nursing and Social security division, of department of health services during FCHV Day 2019. The package has now been rolled out in the entire country with the help of NGOs and CARE. Along with demand generation and system strengthening activities as part of the Nurture program, this FCHV modular package is likely to be instrumental in strengthening the overall community health system.

"I have delivered 20 healthy babies after receiving CARE’s Skilled Birthing Assistant training. I feel very lucky, happy and thankful.

- Arati Sah
Auxiliary Nurse Midwife"
Our Initiatives

**SUAAHARA II**

This USAID funded initiative works with 1,000 days mothers, children under 5 years of age and women of reproductive age and adolescents in 42 districts of Nepal with an aim to improve the nutritional status of women and children.

This is consortium project and CARE has responsibilities of implementing health, GESI and resilience component of the program.

Under the health services, CARE focuses on increasing use of quality health and nutrition services by women and children.

**SAMMAN III & IV**

This Glaxo Smith Kline/CARE UK funded initiative works with women of reproductive age, pregnant women, new-born children and children under 5 years of age in Kailali, Doti, Dadeldhura, Kavre, Sindhuli, Rasuwa, Nuwakot and Sindhupalchowk districts of Nepal with an aim to improve maternal and neonatal health outcome by strengthening and increasing effectiveness of frontline health workers to positively impact maternal, neonatal, and child health goals.

**AWASAR**

This DANIDA/CARE Denmark funded initiative works with school going girls and boys, teachers, farmers groups and mothers groups in Bajura and Mugu with an aim to improve the nutritional and educations status of hard to reach children.
CARE Nepal’s SUSTAIN program strives to improve food and nutrition security, livelihoods, natural resources management and building resilience against impacts of climate change. Through its various initiatives, SUSTAIN program identified and piloted models which build a community’s resilience to the impacts of climate change such as extreme weather conditions, drought, erratic rainfall and disaster events; and which can be replicated at a larger scale. Keeping at heart community mobilization and coordination with government at all levels, these climate resilient models assessed how different groups are affected in different ways by climate change impacts and the cause behind these different impacts. Accordingly, appropriate adaptation response was planned and implemented while ensuring participatory and inclusive targeting and decision-making. To name a few, the models include Implementation of Integrated Sub-watershed Management Plans and local Adaptation Plans of Action, Payment/Incentives for Ecosystem Services, Community Learning and Action Center; and Reflective Institutional Capacity Building Approach for Improved NRM governance work to name a few.

Further, through the various initiatives under this program, 19,142 people from poor vulnerable and socially excluded communities have been organized in 415 Natural Resource Management groups, 80 Tol Land Rights Forum, 444 Community Learning and Action Centers, 151 Farmers Group, and 226 Community Disaster Management Committee to advocate for their rights to manage the natural resources and the government or community funds and resources in their respective communities as a means to promote internal governance, livelihoods and entrepreneurship.

Farmers provided with identification cards which will enable them to utilize Government facilities through a systematic and fair method

Since 2011, CARE’s implementing partner, National Farmers’ Group Federation (NFGF) had been advocating for a government provision to define and classify farmers based on realistic indicators. NFGF’s 7-year long advocacy paid off this year when the provision of Identity Card to the farmers with classification and social security to the farmers was finally included in the federal Right to Food and Food Sovereignty Act 2018.

In order to facilitate proper implementation of this act at the local level, as a start, NFGF worked closely with Belaka Municipality following which and the local government initiated the process of formulating municipal level Agriculture Act and Guideline. As a result, the Agriculture Act of Belaka Municipality 2018 was developed which clearly mentions the provision for categorizing farmers into four groups from the government. This has been successfully put into practice with the local government leading the process in Belaka ensuring fair and equitable distribution of these provisions to the farmers.
HARIYO BAN PROGRAM II

This USAID funded initiative works with the community members involved in Natural Resource Management Groups from Kaski, Syangja, Tanahun, Lamjung, Gorkha, Chitwan, Kailali, Kanchanpur, and Banke districts of Nepal with an aim to increase ecological and community resilience in GoN-identified biodiversity landscapes Chitwan Annapurna Landscape (CHAL) and Terai Arc Landscape (TAL) areas.

POSHAN

Improved Nutritional Outcomes among socially disadvantaged Musahar and Dalit Communities in Siraha District of Nepal

CARE Nepal has been implementing “Improved Nutritional Outcome (POSHAN)” project aligning with the CARE Nepal existing project, “Samarthya” area with the support of JEFF PEERLS. The poor, vulnerable and socially excluded communities, Musahar and Dalit communities of Bhagwanpur Rural Municipality of Siraha District (State 2) focusing on pregnant women, lactating mothers and children below five are the impact populations of this initiative.

SABAL

This USAID funded initiative works with the most marginalized, vulnerable and food insecure households of Makwanpur, Sindhuli, Ramechhap, Udayapur, Okhaldhunga, Khotang, Kavrepalanchowk, and Sindupalchowk districts of Nepal with an aim to ensure that these households are more resilient and food secure.

SAMARTHYA

This is a national level initiative implemented in Okhaldhunga, Udayapur and Siraha with a focus on developing climate resilient scalable models in land and agriculture, and strengthening peoples’ organizations to become more effective in engaging with government at all levels in these areas.

DIGNIFIED WORK

Advocacy to support the ILO convention on ending violence and harassment in the world of work

This is an initiative for organizing, empowering and mobilizing informal sector/home based workers specially the women workers. The initiative focuses on national level advocacy targeted to influence actors relevant to the passing and ratification of the ILO convention.
STRENGTHENING GENDER EQUALITY AND SOCIAL INCLUSION

CARE’s approach to GESI believes that to bring about holistic empowerment, it is critical to address women’s capacities, the relationships of power such as households and communities that affect their choices and the structures such as laws and policies that govern their lives and choices. In 2019, 27% of our projects and initiatives were gender transformative – meaning they contributed to a lasting change in the power and choices women and girls have over their own lives, rather than just a temporary increase in opportunities. A further 9% were gender responsive – meaning they challenged inequitable gender structures, systems, norms, and power relations. A further 64% of our projects and initiatives were gender sensitive – meaning they identified and addressed the different needs of people based on their gender, but did not challenge the root causes of gender inequality.

315 women and girls are meaningfully participating in formal (government-led) and informal (civil-society, private sector) decision-making spaces through CARE’s LEAD initiatives.

PROMOTING INCLUSIVE GOVERNANCE

Promoting inclusive governance is at the core of CARE’s approach to “addressing the underlying causes of poverty and tackling social injustice”. We work at the grassroots level to empower poor and marginalized people to know and act on their rights, have their say and hold to account those in authority. At the same time, we influence those in power to be more responsible, responsive and accountable. Across all of its initiatives, CARE promotes inclusive governance via governance models namely social accountability (mechanisms such as community score card, social audit, etc.), to support local authorities and citizens to engage in dialogue and participatory decision making. In 2019, 9% of our projects and initiatives were transformative in regards to inclusive governance and a further 9% were responsive. A further 82% were accommodating of inclusive governance, that is, these projects and initiatives worked within existing institutions and power relations.

CARE’s Community Score Card tool adopted by local government, in Tikapur, Achham, Dadeldhura and Kavre.
Increasing resilience

One of CARE’s major goals is to build resilience into all our programs. For example, while we provide emergency relief in a food crisis, we also support farmers to increase crop yields, and enable women to start businesses and save money, so that they can afford to buy food for their families. Further, while implementing our other development initiatives, we ensure sustainable and resilient solutions that withstand the test of time and other external obstacles. CARE’s approach to increasing resilience is not an outcome that can be achieved within a specific time frame, but an ongoing process. If the capacities and assets to manage various shocks, stresses, risks & transform their lives in response to new hazards, opportunities & uncertainty are built and supported & if drivers of risk are reduced & if these actions are supported by an enabling environment, then resilience is increased.

In 2019, 41% of our projects and initiatives included actions to increase resilience while 50% of projects integrated fair resilience building activities into their programming.

1,800 HHs have reduced risks from natural disasters through increased understanding and practiced risk reduction measures like go bags and HH level mitigation works.

39 Gender Based Violence survivors operating their businesses are earning in the range of US$ 136 to 600, spending in diversified areas.
