

CARE Nepal's Response

(The second wave of COVID-19 pandemic)

The national context

Highlights

Total cases
662,570

COVID vaccinated population

1,108,868
both doses

Total active cases
26,639

2,621,476
single dose

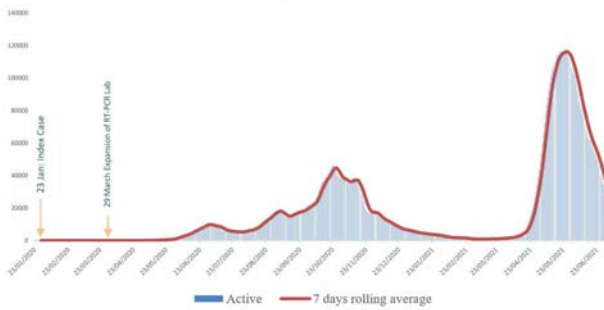

Deaths
9,463

19.2% positivity rate

318.9 deaths per 1
million population due to
COVID

Daily active cases

75,000 masks delivered to Dhangadi Sub-metropolitan City to support the mask campaign

Front liners in CARE distributed faceshields providing their services.

CARE Nepal delivered 200 faceshields to Red Cross Society in Kailali District

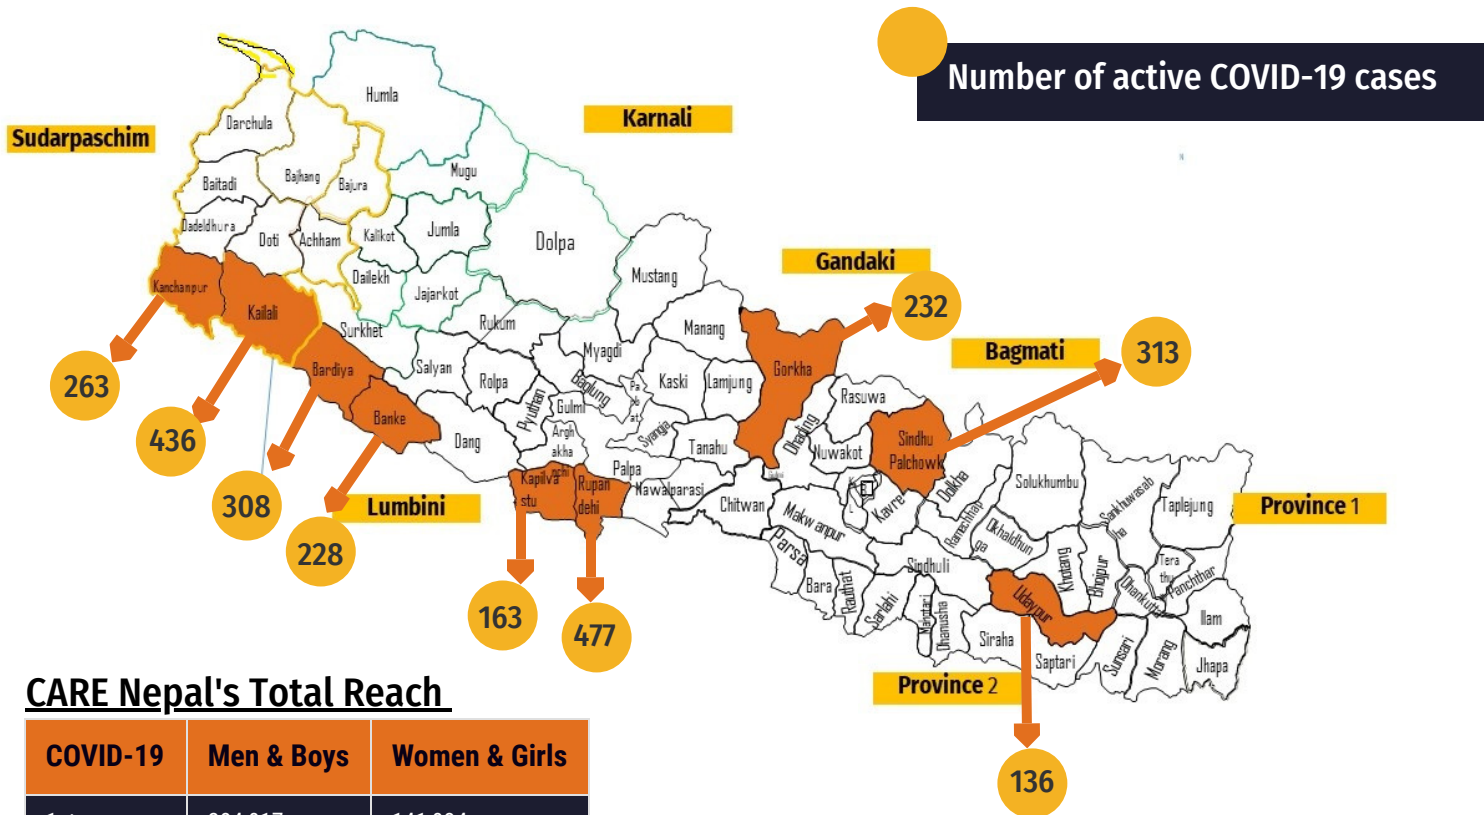

The vaccination awareness campaign run by CARE resulted in high coverage of the vaccine in Thakurbaba Municipality, 93.84% (out of 2194 targeted, 2050 got the vaccination). Likewise, in Bhajani more than 80% (1,740) of senior citizens received the vaccine during the campaign.

Things are tougher for people living with disability. My livelihood wasn't that bad before the lockdown. But since the lockdown started, things changed. We are running out of supplies. I cannot go out to work, and I am not able to feed my family now. Moreover, my husband doesn't support me.
