

CARE Nepal's Response

(The second wave of COVID-19 pandemic)

The national context

Total cases
635,188

COVID vaccinated population

752,110
both doses

2,587,873
single dose

Total active cases
37,950

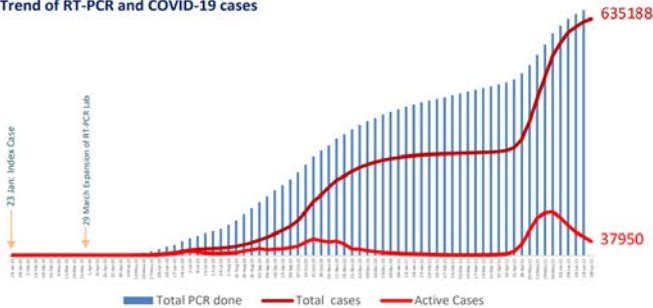

Deaths
9,051

19.1% positivity rate

305.2 deaths per 1
million population due to
COVID

Trend of RT-PCR and COVID-19 cases

I am a single woman. As the lockdown continued, I started running out of supplies. I have been borrowing and managing so far but that will not support me for long. Moreover, the monsoon is approaching and it is surely going to add more tears to lives of people like ours.

Joint handover of health equipment to the Ministry of Health and Population by INGOs, led by CARE

Sharing of the Rapid Gender Analysis findings with different ministries and departments of Nepal Government

Handover of masks and face shields to Dhangadi Sub-metropolitan city

Dhangadi Sub-metropolitan City initiated a compulsory mask campaign to prevent, contain and control the spread of virus. CARE Nepal has been identified as an integral member of the campaign, and is supporting the municipality in planning and execution of the campaign alongside supporting them with masks and faceshields.
